Precision vision
on demand

Evatik

Made from ultra thin handmade acetate, EVATIK's style E-9109 is as light as a feather. With a front thickness of 3.0 mm and a temple thickness of 2.1 mm, this modern full rim, rectangular frame is so lightweight that you may forget you are wearing glasses. Available in size 55-18-145, colors include black, tortoise and havanna black. www.evatik.com or www.classique-eyewear.com

Clariti

Spend the Summer in Havana with Konishi KF8424! Highly durable, flexible and lightweight, this Flex-Titanium frame has a rectangular eye that's wrapped in an antique trim that carries onto the satin temples. This brilliant frame is available in Antique Havana and Matte Steel! www.claritiyewear.com

Trevi

Cotton Club Carbon Fiber Line is constructed of the newest lightweight space age materials and defines the concept of style, extreme quality and luxury. Made of carbon fiber with rubberized temples for comfort, strength and adjustability. Model CC 280 is available in Black, Black and Gun, Black and White (shown) for a striking contrast. Made in Italy and backed by a two year warranty. Sold exclusively in North America by National Lens. www.national-lens.com

Theo

Stromboli is not only an Aeolian island in the Tyrrhenian Sea, north of Sicily (IT), it's also a new theo model. Call it nostalgia. With the Islands collection theo returns to small, friendly frames, but injects them with the latest technology. We invented a new, discreet, patented hinge that emphasizes the pure form of the frame without any distraction. At the Hong Kong Optical fair, theo received the golden V.AWARD for Technology for this special hinge. Both the shape of the hinge and the ear tip refers to these volcanic Islands. www.theo.be

Adlens

Modern technology meets legendary styling. The new Adlens John Lennon™ collection offers a solution for the correction of near, intermediate and distance vision through adjustable focus lens technology. Each lens is continuously adjustable to suit the wearer's needs and features UVA and UVB protection. Lightweight frames come in three color options; metallic gold, silver and pewter.
