Washed Ashore

For a polished and refined look, Evatik Eyewear introduces Driftwood/style 9049 for men. The company is known for offering expression that embodies the fusion of innovative design and technology, and this frame hits the marks with sleek lines and a clean and minimalistic look. Crafted with care in titanium and acetate, these semi-rimless frames look light on the face but very masculine. 9049 is available in brown, black or grey.

A Splash of Colour For Fall

This H2O-themed collection by Theo fixates on the eyebrows and doesn't let go. Using powerful fluorescents in eye-catching colour combos will take your dramatic look even further. Models Bo, O, Nivo and Carro play on the French word for water. The Belgian manufacturer also works in some more subtle colour blocking on more shape-heavy frames within the collection. All are uniquely built so the angled temples connect to the frame at the nose bridge.
