www.visionmonday.com**DISCOVER****Jean-François Rey: Carbonwood**

The French brand has developed special techniques to create lightweight, design-focused eyewear from thin layers of carbon fibre and wood. *20/20 Europe* asked Jean-François Rey to explain how the new concept came about. [Read More](#).

**We Are the Cool Kids**

Wearing frames can be cool, especially for kids and teens. This season, eyewear collections feature fresh colors and a mix of materials which allow the little ones to "be cool" with good vision. New original styles and looks help them express their young personality while wearing frames: little cat eyes for a feminine chic, round shapes and pilot frames for adult-like styling. Another must for the little fashionistas is resistance and hypo-allergenic materials: being cool with style and the ultimate comfort. See what's new for kids this season in this feature from *20/20 Europe*. [Read More](#).
