## ◀ Superflex Kids

Superflex Kids has launched a retro-themed 'Back to School' collection featuring popular acetates and colourful metals. Designed with active kids in mind, all Superflex Kids' models come with spring hinges for increased flexibility and durability. The vintage round-eye shape of SFK-179 is one of 2017's biggest eyewear trends, said the company. The bright, vivid confetti-inspired temple pattern gives this classic shape a fun, modern twist. Listed as a girl's model, we believe this one would suit boys as well. Also available in purple fuchsia blue, brown taupe and burgundy pink. *Distributed by Dynamic Eyewear.*
